On-Board  
Satellite Controller using ARM  
Based Microcontroller -  
Telemetry is an automated  
communications process by  
which measurements and other  
data are collected at remote or  
inaccessible points and  
transmitted to receiving  
equipment for monitoring.

Telemetry - Wikipedia - In the  
context of spaceflight, a satellite  
is an artificial object which has  
been intentionally placed into  
orbit. Such objects are sometimes  
called artificial satellites to  
distinguish them from natural  
satellites such as Earth's Moon.
